

TREE-TOW TRAILER HITCH ADAPTOR FOR TRANSPORTING TREES AND SHRUBS

The Opportunity

The Tree-Tow (<http://tree-tow.com/>) is an innovative trailer hitch adaptor that makes it safe and easy to transport Christmas trees or other shrubs using any vehicle equipped with a trailer hitch.

The Tree-Tow fits any standard hitch (2"). Traditional delivery—tying a tree on top of a vehicle, stowing it into a truck bed, or loading the tree inside an SUV - are tedious and inefficient. The Tree-Tow helps protect vehicles from scratches or sap damage while minimizing set up time. And the tree is already mounted in a stand upon delivery.

Christmas trees can be mounted vertically in the same manner as normally displayed at home. The loose needles will fly away and sap won't get a chance to drip on the roof.

The Tree-Tow works equally well with garden shrubs and small trees that are delivered in a 5-gallon bucket. The Tree-Tow tree stand can be removed leaving room for the bucket.

Technology

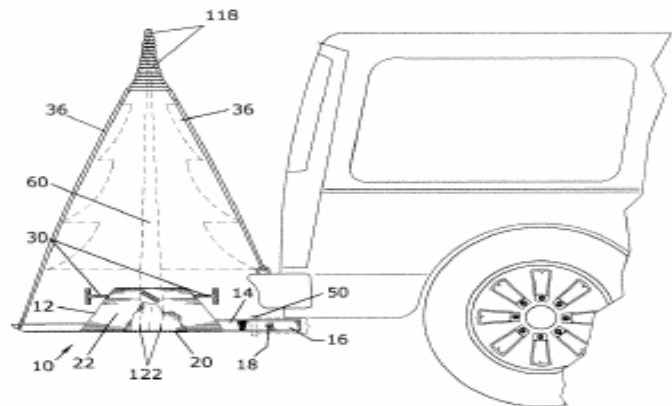

The Tree-Tow offers the following advantages:

- Easy to use and operate
- Three steps from tree lot to tree delivery
- Tree stand acts as hitch for towing
- Secure towing mount with safety strap
- Quick unload with fold-away hitch
- Also holds a 5-gallon bucket for year-round use
- Protects your vehicle from sap and needles
- Frees up space in your vehicle for passengers and gifts
- Clean release prevents spills

Intellectual Property

Corban Services, LLC's Tree-Tow design is protected by US Patent Application 11/110,400, "Tree Carrier for Vehicle Trailer Hitch." Corban's patent commands broad coverage for the combination of a tree stand/bucket carrier into a trailer hitch.

For More Information

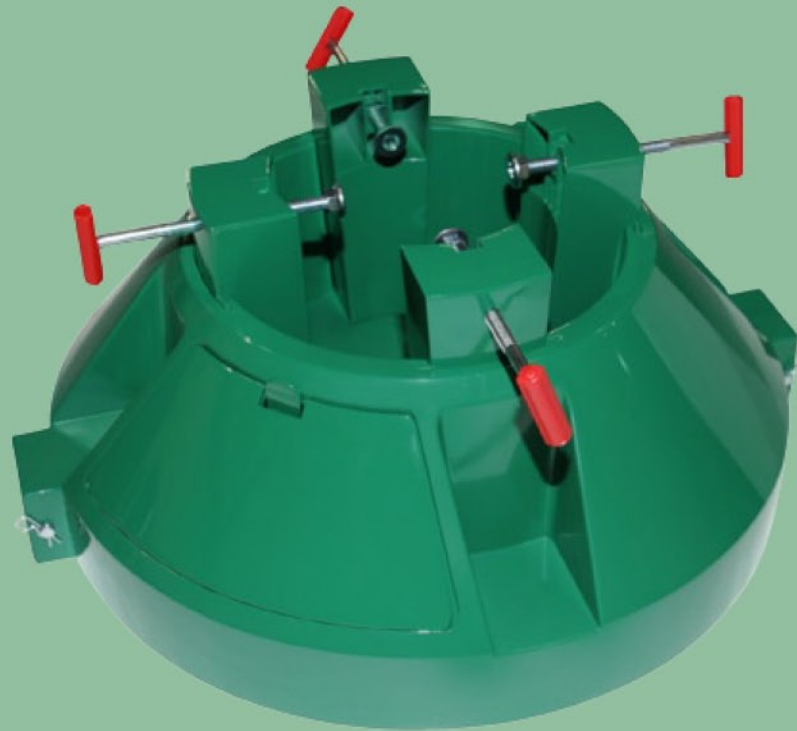

The Company is seeking qualified licensees to bring its innovative new tree carrier technology into commercial use. For more information, contact:

This amazing product makes it safe and easy to deliver your Christmas tree by using any vehicle equipped with a tow hitch. Simply mount your tree, drive home, unload and carry it right into your living room—already on a stand.

The Tree-Tow fits any standard hitch (2"), helping you spend less time setting up, and more time decorating your Christmas tree. Traditional delivery—tying your tree on top of your vehicle, throwing it into your truck bed, or loading the tree inside your SUV are things of the past. The Tree-Tow will help protect your vehicle from scratches or sap damage while minimizing set up time.

As fun as it is to shop for a Christmas tree, the delivery and set-up can be a chore. Imagine how different the chore becomes with this fancy hitch and stand combination for towing and displaying your Christmas tree. Let the tree lot attendant do the messy work. The hassle of removing a temporary stand will become a distant memory as each year passes.

Enjoying your holiday becomes easier with the Tree-Tow. Think of how fun it will be as you drive home towing your Christmas tree—mounted vertically in the same manner you display the tree in your home. The loose needles will fly away and sap won't even get a chance to drip on your roof. As you cruise home and pull into your driveway, imagine how heads will turn to see your tree and how impressed your neighbors are with your new purchase.

To sum it all up, buy your Tree-Tow today! You will save time, protect your vehicle and impress your friends. With the Tree-Tow you can create fun for the whole family!

CLEAN REMOVAL:
Quick Release Action, just pull straight up and the tree is ready for disposal

THREE EASY STEPS FROM THE TREE LOT TO IN-HOME TRIMMING.

**STEP
1**

Place the tree inside the custom stand, screw in and clamp.

**STEP
2**

Using the safety cap and straps secure the tree onto your tow hitch.

**STEP
3**

Drive home, detach and bring your tree inside—already on the stand!
